

POOR WILL'S  
ALMANACK,

FOR THE  
YEAR OF OUR LORD, 1795:

BEING THE THIRD AFTER BISSEXTILE OR LEAP-YEAR.

CONTAINING

THE MOTIONS OF THE SUN AND MOON;

The true Places and Aspects of the Planets ;

THE RISING, SETTING, AND DECLINATION  
OF THE SUN;

The Rising, Setting, and Southing of the MOON;

THE

LUNATIONS, CONJUNCTIONS, AND ECLIPSES;

Rising, Setting, and Southing of the Planets,  
and noted fixed Stars ;

THE EQUATION OF TIME ;

Time of High Water, Morn. and Even. at Philadelphia ;

Length of Days ; Festivals and other Remarkable Days ;

Yearly Meetings of the People called Quakers ; Courts ;

Tables of Interest ; Table for reducing Shillings and

Pence into Cents ; Table of the Value of Gold in

Dollars and Cents ; Scale of Depreciation ; Roads, &c.

ALSO

A Variety of Essays in PROSE and VERSE.

---

PHILADELPHIA:

PRINTED FOR AND SOLD BY JOSEPH CRUKSHANK, NO. 87,  
HIGH-STREET.

READER, please to observe,

**F**IRST. The calculations of this Almanack are made to solar or apparent time : to which for the mean or clock time, apply the equation given in the sixth column ; adding when the sun is slow, and subtracting when fast.

II. The time of high water at Philadelphia is so computed as to serve for either morning or afternoon, nearly enough for common use ; the morning flood being about 12 m. earlier than the time in the tide column, and that of the afternoon as much later ; except when there happens but one flood in the day, in which case the true time is given, and distinguished by this mark. \*

III. The sun's declination is carefully fitted to the meridian of Philadelphia, for every noon of the present year, in order to save the accurate American mariner the trouble of proportioning the declination taken from the London tables to his meridian, in voyages near our coast ; and that those who are not so particular as to attend to the difference of the London and Philadelphia declinations, may have their reckonings the more correct.

IV. The rising, setting, or southing of a star may be carried several days backward by adding, or forward by subtracting, 4 m. per day : for instance : on the 8th of the first Month (January) Sirius is south at 15 m. past 11 ; adding 12 m. for three days sooner, we have 11 h. 27 m. for the southing on the 5th ; and deducting 8 m. for 2 later, leaves 11 h. 7 m. for that of the 10th of the same month, &c.

V. The time of Alioth's passage over the meridian, or when a plumb-line apparently cuts both the Pole-star and Alioth, is given, for the first six months above, and for the last six below, the pole, to five days in every month ; and may be readily known for any day by the preceding note. These two stars will be visibly coincident with a level east and west line at 5 h. 59 m. before or after Alioth passes the meridian : Thus we may regulate time-pieces to a minute, or tell the time without them. The Pole-star is on the meridian five minutes later than Alioth, when a true meridian line may be drawn by it, and the magnetic variation thereby determined, &c.

Alioth is the first star in the tail of the Great-Bear, viz. that next to the square ; or, it is the third star of the seven, commonly called the Waggon, or Plough, counting toward those two of them denominated the Pointers.

VI. As the day ends at midnight, the rising, setting and southing of the moon, when after that time, is found against the succeeding day : so, on the night of (or following) the 13th. of the first Month (January) the moon rises at 1 h. 6 m. after midnight, viz. in the morning of the 14th, not at 0 h. 9 m. the time opposite the 13th, which is that of its rising the preceding morning.

---

*To ascertain the Time of Night by the Moon's Shadow on a Sun Dial.*

TO the time indicated by the shadow, add the moon's southing, and the Sum, when under 12 h. or the excess thereof above 12, will be the time of night.

# The ANATOMY of Man's Body, as said to be governed by the Twelve CONSTELLATIONS.

♈ Aries, the Head and Face.

*To know where the Sign is.* First find the day of the month, and against it the sign or place of the moon, in the eighth column. Then finding the sign here, it shews the part of the body it is said to govern.

We have inserted the above, and the prognostics of the weather, according to the most approved methods; but think it proper to inform our readers, that, in this enlightened age, the learned put but little confidence in them.

## Characters explained.

● New Moon	☉ or ☼ Sun	♿ Mercury

## THE ABSURDITY OF WISHING.

**C**AN we succeed by wishing?—'tis a jest;  
 That constant hectic of a fool at best.  
 Those things we fondly doat on, when possess'd,  
 Insipid grow, and are no more carest'd.  
 One point obtain'd, another strikes the sight,  
 And hope deludes us with a dazzling light.  
 Sure 'tis absurd, impertinent, and vain,  
 To wish for something which we cannot gain;

Account of the Palma Christi: or  
 Tree that produces the Castor Oil  
 Nut.

**T**HIS tree is of speedy growth; as, in  
 one year it arrives at its full height,  
 which seldom exceeds twenty feet. The  
 trunk is subligneous; the pith is large; the  
 leaves broad and palmated; the flower spike  
 is simple, and thickly set with yellow blös-  
 soms in the shape of a cone; the capsules  
 are triangular and prickly, containing three  
 smooth grey mottled seeds.

When the bunches begin to turn black,  
 they are gathered, dried in the sun, and the  
 seeds picked out. They are afterwards put  
 up for use, as wanted, or for exportation.

Castor oil is obtained either by expression  
 or by decoction. The first method is prac-  
 tised in England; the latter in Jamaica. It  
 is common first to parch the nuts or seeds in  
 an iron pot over the fire: but this gives the  
 oil an empyreumatic taste, smell, and co-  
 lour; and it is best prepared in this man-  
 ner:

A large iron pot or boiler is first prepa-  
 red, and half filled with water. The nuts  
 are then beaten in parcels, in deep wooden  
 mortars, and after a quantity is beaten, it is  
 thrown into the iron vessel. The fire is  
 then lighted, and the liquor is gently boiled  
 for two hours, and kept constantly stirred.

# F E B R U A R Y. Second Month.

Life's present comforts this at once destroys,  
 And makes us restless for untasted joys.  
 Heav'n kindly grants the boon, which we implore:  
 That boon receiv'd, we murmur as before;  
 By wild caprice, from youth to age are led,  
 Nor cease complaints, till number'd with the dead.  
 The miser, brooding o'er his treasur'd heap,  
 Can no enjoyment from possession reap;

From long debate the counsel rose,  
And viewing Shalum's tricks with joy,  
To Harvard-hall, o'er wastes of snows,  
They sent the tawny-colour'd boy.

D.	☾ sets	☾ son	H. W.	
1	4 58	10 25	11 57	About this time, the oil begins to separate,
2	5 50	11 18	0 37	and swims on the top, mixed with a white
3	rises	morn.	1 30	froth, and is skimmed off, till no more rises.
4	5 57	0 10	2 22	The skimmings are heated in a small iron
5	6 57	0 58	3 10	pot, and strained through a cloth. When
6	7 57	1 44	3 56	cold, it is put up in jars or bottles for use.
7	8 56	2 29	4 41	Castor oil, thus made, is clear and well
8	9 52	3 12	5 24	flavoured; and, if put into proper bottles,
9	10 49	3 53	6 5	will keep sweet for years.
10	11 46	4 35	6 47	The expressed castor oil soon turns rancid,
11	morn.	5 18	7 30	because the mucilaginous and acrid parts of
12	0 43	6 3	8 15	the nut are squeezed out with the oil. On
13	1 41	6 50	9 2	this account, I give the preference to well
14	2 38	7 39	9 51	prepared oil by decoction.
15	3 34	8 31	10 43	An English Gallon of the seeds yields a-
16	4 28	9 25	11 37	bout two pounds of oil, which is a great
17	5 18	10 20	0 20	proportion.
18	6 4	11 16	1 4	Before the disturbances in America, the
19	sets	aft. 12	2 0	planters imported train oil for lamps and o-
20	6 56	1 6	2 54	ther purposes about sugar works. It is now
21	8 9	2 0	3 48	found that the castor oil can be procured as
22	9 21	2 54	4 41	cheap as the fish oil of America. It burns
23	10 32	3 47	5 35	clearer, and has not any offensive smell.
24	11 42	4 40	6 28	This oil, too, is fit for all the purposes of
25	morn.	5 34	7 22	the painter, or for the apothecary, in oint-
26	0 49	6 29	8 16	ments and plasters.
27	1 53	7 25	9 13	As a medicine, it purges without stimu-
28	2 53	8 21	10 9	lus; and is so mild as to be given to infants
				soon after birth, to purge off the meconium.

# M A R C H. Third Month.

But always thirsting to increase his store,  
In plenty pines, ridiculously poor.

The youthful statesman, by ambition fir'd,  
Burns with impatience for the point desir'd;  
But ere the wish'd-for prospect is in view,  
Soon, soon he pants another to pursue.

"Give me a horse," Philario cries, "I'll ride—  
"There's no diversion in the world beside;"

All oils are noxious to insects: but the castor oil kills and expels them. It is generally given as a purge after using the cabbage bark some days.

In constipation and belly-ach, this oil is used with remarkable success. It sits well on the stomach, allays the spasm, and brings about a plentiful evacuation by stool, especially if at the same time fomentations, or the warm bath, are used.

Belly-ach is at present less frequent in Jamaica than formerly, owing to several causes. The inhabitants, in general, live better and drink better liquors. But the excessive drinking of new rum still makes it frequent among soldiers, sailors, and the lower order of white people. I have known it happen too from visceral obstructions, after intermittents, or March fevers in Jamaica.

## The Deformed and Handsome Leg.

By Dr. Franklin.

THERE are two sorts of people in the world, who, with equal degrees of health and wealth, and the other comforts of life, become, the one happy, and the other miserable. This arises very much from the different views in which they consider things, persons, and events—and the effect of those different views upon their own minds.

# A P R I L. Fourth Month.

Till fancy gently whispers in his ear,  
 "Methinks a pair would more genteel appear."  
 These, purchas'd once, unnumber'd wants create;  
 Now splendor charms him, equipage, and state:  
 Shifting about, inconstant as the wind,  
 To various schemes, at various times inclin'd;  
 What'er is present grants a transient joy:  
 New objects strike him, and as quickly cloy.

In whatever situation men can be placed, they may find conveniencies and inconveniencies: in whatever company, they may find persons and conversations more or less pleasing: at whatsoever table, they may meet with meats and drinks of better and worse taste, dishes better and worse dressed. In whatever climate, they will find good and bad weather: under whatever government, they may find good and bad laws, and good and bad administration of those laws. In every poem, (or work of genius) they may see faults and beauties. In almost every face, and every person, they may discover fine features and defects, good and bad qualities.

Under these circumstances, the two sorts of people above mentioned fix their attention, those who are disposed to be happy, on the conveniencies of things, the pleasant parts of conversation, the well dressed dishes, the goodness of the wines, the fine weather, &c. &c. and enjoy all with chearfulness. Those who are to be unhappy, think and speak only of the contraries. Hence they are continually discontented themselves; and, by their remarks, sour the pleasures of society, offend personally many people, and make themselves every where disagreeable. If this turn of mind was founded in nature, such unhappy persons would

# M A Y. Fifth Month.

Fantascus weary'd out with town delights,  
 Days spent in nonsense, and luxurious nights,  
 Flies to the country, there expects to meet  
 Ease for his mind, and happiness complete :  
 But still past pleasures are impress'd so strong,  
 No rural scenes can captivate him long.

Prompted by fancy and the love of gain,  
 Mercator braves the rough tempestuous main ;

convenient, especially when one finds himself entangled in their quarrels.

An old philosophical friend of mine was grown, from experience, very cautious in this particular, and carefully avoided any intimacy with such people. He had, like other philosophers, a thermometer to show him the heat of the weather, and a barometer, to mark when it was likely to prove good or bad; but there being no instrument invented to discover, at first sight, this unpleasant disposition in a person, he for that purpose made use of his legs, one of which was remarkably handsome, the other, by some accident, crooked and deformed. If a stranger, at the first interview, regarded his ugly leg more than his handsome one, he doubted him. If he spoke of it, and took no notice of the handsome leg, that was sufficient to determine my philosopher to have no further acquaintance with him. Every body has not this two-legged instrument—but every one, with a little attention, may observe signs of that carping, fault-finding disposition, and take the same resolution of avoiding the acquaintance of those infected with it. I therefore advise those critical, querulous, discontented, unhappy people, that if they wish to be respected and beloved by others, and happy in themselves, they should leave off looking at the ugly leg.

# JULY. Seventh Month.

With children blest, anxiety commences:

He talks of nothing then, but vast expences.

Thus discontent seems woven in our frame,

And perfect bliss is nothing but a name.

Yet if we strove with diligence sincere

To keep our breasts from cank'ring envy clear,

Much of this peevish humour would subside;

The greatest bar to happiness, is pride.

## Method of destroying the putrid Smell which Meat acquires during hot Weather.

EVERY body knows that in warm and damp weather, or during a storm, meat becomes corrupted in the butchers' shops, in larders, and even in the driest places; that it contracts a fetid and disgusting smell, which it retains after it has been boiled, and that the broth or soup made of it is equally disagreeable. This smell I considered as the effects of gaz, which expands as soon as a putrid fermentation begins: and I thence concluded, that if the gaseous particles could be extracted from the meat or broth, nothing of that nauseous smell would be perceived. I therefore endeavoured to find an absorbent capable of producing that effect.

After different attempts, I at length thought that by throwing into the saucepan or kettle in which the meat was boiling, a burning coal, it would absorb the gaz; because the fiery particles issuing with impetuosity from the coal, while the water cannot penetrate into it, the pores of the coal remaining open, the subtle gaz, which has a great affinity to the phlogiston of the coal, might insinuate itself into it, and remain there fixed, by disengaging itself from the meat and broth, which are impregnated

# AUGUST, Eighth Month.

## A HYMN TO THE CREATOR.

**O** GOD! whose word spake into birth  
 Whate'er exillence boasts,  
 The moon, the itars, the sun, the earth,  
 The heavens and all their hosts;  
 From world to world, from sun to sun,  
 I turn my wand'ring eyes:  
 Their swiftest glance thy works out-run,  
 New suns and worlds arise:

“ And why,” he cried, “ did I forsake  
 “ My native woods for gloomy walls?  
 “ The silver stream, the limpid lake,  
 “ For musty books and college halls?

D.	Drift	D. fu.	H. w.		
1	7 58	0 21	2 33	with it.	I therefore made the experiment,
2	8 33	1 14	3 26	which succeeded according to my wish.	E-
3	9 7	2 5	4 17	very time I had an opportunity; I made a	trial of my discovery; and others, to whom
4	9 39	2 56	5 8	I communicated it, found it to answer equal-	ly well. The manner of proceeding in this
5	10 13	3 46	5 58	operation is as follows:	
6	10 47	4 37	6 49	First, put the meat intended for making	soup into a saucepan full of water; scum it
7	11 23	5 29	7 41	when it boils; and then throw into the	saucepan a burning coal, very compact and
8	morn.	6 23	8 35	destitute of smoke. Leave it there for two	minutes, and it will have contracted all the
9	0 3	7 18	9 30	smell of the meat and the soup.	
10	0 49	8 15	10 27	Secondly, if you wish to roast a piece of	meat on the spit, you must put it into water
11	1 41	9 13	11 25	till it boils, and after having scummed it,	throw a burning coal into the boiling water
12	2 39	10 11	0*11	as before. At the end of two minutes, take	out the meat, and having wiped it well in
13	3 42	11 7	0 55	order to dry it, put it upon the spit.	
14	sets	ft. 0	1 48	Thirdly, when fresh butter has not been	salted in proper time, or when salt butter
15	7 22	0 51	2 39	has become rancid or musty, after melting	and scumming it, dip in it a crust of bread
16	8 13	1 38	3 26	well toasted on both sides; and at the end	of a minute or two, the butter will lose its
17	8 42	2 23	4 11	disagreeable odour, but the bread will be	found fetid.
18	9 10	3 6	4 54	We read in a letter from Mr. Crell, to	Mr. de la Metherie, that Mr. Lowitz has
19	9 37	3 49	5 45	continued his experiments on the quality

then pressed through hair bags, and the juice strained through two sieves, the uppermost of hair, the lowermost of muslin. After this the cyder is put into casks, when great attention is necessary to discover the exact time in which the pumice still remaining in the juice, rises on the top, which happens from the third to the tenth day, according to the greater or less heat of the weather. This body does not remain on the top more than two hours, consequently care should be taken to draw off the cyder before it sinks; this may be done by means of a plug, observing not to attempt to skim off the pumice, as it is thereby precipitated to the bottom. When drawn off, the cyder is put into casks. Particular attention is again required to prevent the fermentation, when the least inclination towards it is discovered: this may be done, by means of a small quantity of cyder spirits, to be regulated by the state of the cyder, but not to exceed one gallon per 112 gallons of cyder. In the month of March, the cyder is again drawn off, when all risk of fermentation ceases. It is then put into good casks. Old wine casks are preferred; those which have contained rum, are always avoided.

# NOVEMBER. Eleventh Month.

Till, sleep'd in sorrow, and besieg'd with pain,  
Too late I found all earthly riches vain.

Disease with scorn threw back the fordid fee:  
And death still answer'd--what is gold to me?

Fame, titles, honours, next I vainly fought;  
And fools, obsequious, nurs'd the childish thought:  
Circled with brib'd applause and purchas'd praise,  
I built on endless grandeur endless days:

## Thoughts on raising Indian Corn.

AS the raising of Indian corn is no small part of the profit of the farmer, and as the corn is often hurt with early frost, I would remind those who wish to secure their crop, that it is necessary to take the first ripe ears for seed, which may be easily done, by observing your field, when it first begins to ripen; you will then see here and there an ear, all over the field, turned white, which ears should be plucked off, hung up, and thoroughly dried. If it be neglected a few days, or if there comes a small frost, they cannot be known from the rest of the corn. Practising this method, your corn will be ten days or a fortnight earlier in the season, and so escape the early frosts. From my own experience, I believe that by practising the above method, there would be thousands of bushels more of round corn raised in a year, in one single county.

## A N E C D O T E.

AN old American Indian being at an Inn in New-York, met with a gentleman who gave him some liquor, and being rather lively, boasted he could read and write English. The gentleman, willing to indulge him in displaying his knowledge, begged leave to propose a question, to which

# DECEMBER. Twelfth Month.

But death awoke me from my dream of pride;  
And laid a prouder beggar by my side.

Pleasure I courted; and obey'd my taste;  
The banquet smil'd, and smil'd the gay repast:  
A loathsome carcase was my constant care;  
And worlds were ransack'd but for me to share.  
Go on, vain man, in luxury be firm;  
Yet know— I feasted, but to feast a worm!

the old man consented. He was then asked who was the first circumcised? The Indian immediately answered, father Abraham: and directly asked the gentleman, who was the first quaker? He said it was very uncertain, as people differed in their sentiments exceedingly. The Indian perceiving the gentleman unable to resolve the question, put his fingers into his mouth, to express his surprise, and looking stedfastly, told him, that *Mordecai* was the first quaker, for he would not pull off his hat to *Haman*.

#### Cure for Frost Bites.

**R**UB the part affected three or four times before the fire with the fat of dunghill fowls—then rub it with flannel, and wrap it up. In two or three days the cure will be effected.

#### A Recipe for Bitters, to prevent the Fever and Ague, and all other Fall Fevers.

**T**AKE of common meadow calamus, cut into pieces, of rue, wormwood and camomile, or centaury or horehound, of each two ounces; add to them a quart of spring water, and take a wine-glass full of it every morning fasting. This cheap and excellent infusion, is far more effectual in preventing fevers than raw spirits, or the strongest bitters made with spirits; both of which make the breath offensive: and those who use them are very apt to get into a habit of drinking spiritous liquors.

# ECLIPSES FOR THE YEAR 1795.

I. An Eclipse of the *Sun*, on the 20th of the First Month (January) at 8 minutes past 7 in the evening, invisible here; but may be seen at California; and will be central in the great South Sea, westward of the Sandwich Islands.

II. Of the *Moon*, on the 3d of the Second Month (February) in the evening, visible; H. M.

Beginning at	-	-	-	5	58
Middle	-	-	-	7	24
Ecliptic Opposition	-	-	-	7	31
End	-	-	-	8	50

Digits eclipsed,  $7\frac{1}{2}$  on the Moon's south limb.

III. Of the *Sun*, on the 16th of the Seventh Month (July) in the morning, at half past 2, invisible.

IV. A small eclipse of the *Moon*, on the 31st of the Seventh Month (July) at 2h. 52m. in the afternoon, not visible in the United States.

*The Number of Inhabitants in each of the United States, agreeably to the Census taken in the Year 1791, in Conformity to Act of Congress.*
